

Our theme for the academic
year 2020 - 2021 is
“COMPETENCY BASED
EDUCATION (CBE)”

Our competency-based education model is an outcome-based approach which focuses on the demonstration and application of learning. This model of learning enables our students engage in the learning exercises, activities and experiences, thereby acquiring and demonstrating their knowledge and skills which have predetermined learning objectives and outcomes.

HOW DO WE ACHIEVE THIS?

Decide the competency to be focussed upon in a particular class

Follow personalised learning and prepare personalised learning plans

Teachers plan and develop their own lesson and instructional formats and activities

Make students aware of the learning objective and are able to describe them

Students are aware of what they are expected to know and are empowered to demonstrate their learning

Assessment is continuous and formative

Students learn actively and apply the skill set developed

Result is holistic and sustainable learning
