

BLOOM PUBLIC SCHOOL

As a part of Bloom's competency based education policy and to upgrade our children with 21st Century skills, we are starting with a '**Science Circle**'.

The endeavour by us would be to arouse the curiosity in the children, inculcate the scientific temperament and to stimulate their own thinking process and creativity.

With that as the overall aim the, specific goals set forth by the Science Circle are –

- To develop general interest in science.
- Inculcate scientific attitude and temperament.
- To develop habits of exploration and creative faculties.
- To stimulate active participation and initiative amongst students in the learning process.
- To keep the students updated with recent advances in science.
- To provide opportunity to display talent and creativity through exhibits.
